

Our safes for
your peace of mind

Made in EU

www.charvat-safe.com

The history of our company begins in the spring of 1991, when my parents came up with the idea...

They started in very modest conditions and made safes literally on their knees.

I still remember myself as a little boy running around the workshop and looking under the hands of the first two employees.

Although our production was improvised at the beginning, my parents had a clear vision from the start—quality without compromise. The bet on this value definitely paid off.

We sold our 100th safe in just nine months. Our company's name was spreading among customers and building its good reputation. It didn't take long before we managed to win a major contract for the Ministry of the Interior. This contract was a real challenge for us. But we knew that if we could do it, it would take us a big step forward. As you read these lines today, it's clear that we succeeded.

In the Czech Republic in 1994 we already had a well-established network of quality dealers. During the following years we served thousands of Czech customers. We have supplied our safes to leading retail companies, state institutions, as well as many households.

The turning point came in 1995, when we signed an exclusive representation agreement with the Dutch company De Raat. In the following years, we supplied safes to a number of important European institutions, including the European Parliament.

In the following years, we have managed to build prospective and stable business relationships with partners throughout Western Europe. After three decades of our business' existence, exports account for a substantial part of our sales. In 2001 we sold our 10,000th safe, thanks to export customers.

In 2010 I took over the management of our company. In that year we also reached an impressive figure of 40,000 safes produced.

I continue to follow my parents' vision. I share their view—**you buy a safe for a lifetime.**

I know that we cannot do it without honest work and that we must not rest on our laurels if we want to keep the CHARVÁT brand at the forefront of European safe manufacturers.

I try to instill the philosophy of our family business in my sons so that once they take over the management of the company, they can continue to build on our traditional values. For now, however, they are more likely to run around production (as I did years ago) and look under the hands of our experienced staff.

We hope to be able to convince you of the quality of our products in person or through our partners.

Jakub Charvát,
owner and managing director of the company

Free-Standing Safes

Secure storage of valuables and important documents. Suitable for use in offices, stores or homes. Certified according to EN 1143-1 in safety classes II. and III.

Deposit Safes

Suitable for bars, nightclubs, petrol stations, currency exchange offices and shops—in short, wherever there is a constant movement of people responsible for storing valuables that need to be stored quickly and conveniently. Certified in security class II. according to EN 1143-2.

Archive Safes

Secure storage of important documents and valuable objects in offices. Suitable for archiving company documents that should be stored for security purposes—against burglary, theft, but also as protection against small-scale fire. 1610 variants are certified in S1 class according to EN 14 450.

The safes can be painted in four basic shades with a structural surface. Other colours according to the RAL colour chart—on request.

Anthracite—RAL 7016

Light Grey—RAL 7035

Black—RAL 9005

Signal White—RAL 9003

Why want our safes, specifically

We have been manufacturing safes for more than 30 years and are constantly improving them. We are the ones who know why this is welded in the safe and why that is screwed in. Why this lock is better in this case and why that lock is better in that case.

When we make a promise—we keep it.

We don't blather to the world that we just sold you a safe.
We have clean criminal records and **we put the customer first.**

References

We treat our customers as if they are buying an intimate item and **the less people know about it—the better.**

Among our customers we have individuals, sole traders, ministries and multinational corporations.

Since 1991 we have delivered **over 60,000 safes.**
At the same time, we produce around **2,000 products a year** in our workshop in Smržovka and most of them go to European countries.

We believe that you too will appreciate **honest Czech craftsmanship.**

And what about all those bananas?

Of course, there may be various theories as to why there are bananas lying around in the safes. But we simply use bananas to represent the size of the safes and as part of a marketing approach. The goal was to create something that would catch your eye and get stuck in your head.

After all, a safe isn't just for storing traditional valuables like money and jewellery, but can also be used to protect anything that you consider valuable.

And finally, isn't it great to discover that, for example, the NS 3/II safe is two bananas wide?
